## Summary of Our Prior Work on Censorship

## Summary of Our Prior Work on Censorship

## Summary of Our Prior Work on Censorship

- E.g., Everyone knows the goal of censorship:

## Summary of Our Prior Work on Censorship

- E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies

## Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*

## Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- What Could be the Goal?

# Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- What Could be the Goal?
  - ① Stop criticism of the state

# Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- What Could be the Goal?
  - ① Stop criticism of the state
  - ② Stop collective action

# Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- What Could be the Goal?
  - ① ~~Stop criticism of the state~~ *Wrong*
  - ② Stop collective action

# Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- What Could be the Goal?
  - ① ~~Stop criticism of the state~~ *Wrong*
  - ② Stop collective action *Right*

# Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- What Could be the Goal?
  - ① ~~Stop criticism of the state~~ *Wrong*
  - ② ~~Stop collective action~~ *Right*
- Implications: Social Media is Actionable!

# Summary of Our Prior Work on Censorship

Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- What Could be the Goal?
  - ① ~~Stop criticism of the state~~ *Wrong*
  - ② Stop collective action *Right*
- Implications: Social Media is Actionable!
  - Chinese leaders:
    - measure criticism: to judge local officials

# Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- What Could be the Goal?
  - ① ~~Stop criticism of the state~~ *Wrong*
  - ② ~~Stop collective action~~ *Right*
- Implications: Social Media is Actionable!
  - Chinese leaders:
    - measure criticism: to judge local officials
    - censor: to stop events with collective action potential

# Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- **What Could be the Goal?**
  - ① ~~Stop criticism of the state~~ *Wrong*
  - ② ~~Stop collective action~~ *Right*
- **Implications: Social Media is Actionable!**
  - Chinese leaders:
    - measure criticism: to judge local officials
    - censor: to stop events with collective action potential
  - Thus, we can use criticism & censorship to predict:

# Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- **What Could be the Goal?**
  - ① ~~Stop criticism of the state~~ *Wrong*
  - ② ~~Stop collective action~~ *Right*
- **Implications: Social Media is Actionable!**
  - Chinese leaders:
    - measure criticism: to judge local officials
    - censor: to stop events with collective action potential
  - Thus, we can use criticism & censorship to predict:
    - Officials in trouble, likely to be replaced

# Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- What Could be the Goal?
  - ① ~~Stop criticism of the state~~ *Wrong*
  - ② Stop collective action *Right*
- Implications: Social Media is Actionable!
  - Chinese leaders:
    - measure criticism: to judge local officials
    - censor: to stop events with collective action potential
  - Thus, we can use criticism & censorship to predict:
    - Officials in trouble, likely to be replaced
    - Policies that generate dissent (& interest of leaders)

# Summary of Our Prior Work on Censorship

- ~~E.g., Everyone knows the goal of censorship:  
Stop criticism, protest, & collective action about the state,  
its leaders, and their policies~~ *Wrong*
- **What Could be the Goal?**
  - ① ~~Stop criticism of the state~~ *Wrong*
  - ② ~~Stop collective action~~ *Right*
- **Implications: Social Media is Actionable!**
  - Chinese leaders:
    - measure criticism: to judge local officials
    - censor: to stop events with collective action potential
  - Thus, we can use criticism & censorship to predict:
    - Officials in trouble, likely to be replaced
    - Policies that generate dissent (& interest of leaders)
    - Government action outside the Internet

# Summary of Our Prior Work on Censorship

# Goal of China's 50c Party

## Goal of China's 50c Party

- Prevailing view of scholars, activists, journalists, social media participants:

## Goal of China's 50c Party

- Prevailing view of scholars, activists, journalists, social media participants: 50c party argues with & debates against those who criticize the government, its leaders, and their policies

## Goal of China's 50c Party

- Prevailing view of scholars, activists, journalists, social media participants: 50c party argues with & debates against those who criticize the government, its leaders, and their policies

It's antidisestablishmentarianism!

## Goal of China's 50c Party

- Prevailing view of scholars, activists, journalists, social media participants: 50c party argues with & debates against those who criticize the government, its leaders, and their policies

Evidence?

## Goal of China's 50c Party

- Prevailing view of scholars, activists, journalists, social media participants: 50c party argues with & debates against those who criticize the government, its leaders, and their policies

Evidence? A few anecdotes;

## Goal of China's 50c Party

- Prevailing view of scholars, activists, journalists, social media participants: 50c party argues with & debates against those who criticize the government, its leaders, and their policies

**Evidence?** A few anecdotes; “no ground truth”;

## Goal of China's 50c Party

- Prevailing view of scholars, activists, journalists, social media participants: 50c party argues with & debates against those who criticize the government, its leaders, and their policies

**Evidence?** A few anecdotes; “no ground truth”; “no successful attempts to quantify” 50c party activity;

## Goal of China's 50c Party

- Prevailing view of scholars, activists, journalists, social media participants: 50c party argues with & debates against those who criticize the government, its leaders, and their policies

**Evidence?** A few anecdotes; “no ground truth”; “no successful attempts to quantify” 50c party activity; even several analyses with made up dependent variables!

## Goal of China's 50c Party

- ~~Prevailing view of scholars, activists, journalists, social media participants: 50c party argues with & debates against those who criticize the government, its leaders, and their policies~~ *Wrong*

## Goal of China's 50c Party

- ~~Prevailing view of scholars, activists, journalists, social media participants: 50c party argues with & debates against those who criticize the government, its leaders, and their policies~~ *Wrong*
- Does not argue; does not engage on controversial issues

## Goal of China's 50c Party

- ~~Prevailing view of scholars, activists, journalists, social media participants: 50c party argues with & debates against those who criticize the government, its leaders, and their policies~~ *Wrong*
- Does not argue; does not engage on controversial issues
- **Distracts**; redirects public attention from criticism and central issues to **cheerleading** and positive discussions of valence issues

    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to

# Theoretical Implications

- For China:
  - Do not engage on controversial issues:
    - No censoring of criticism
    - No 50c posts arguing against criticism
  - Stop collective action:
    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to
    - ↓ common knowledge of grievances

# Theoretical Implications

- For China:
  - Do not engage on controversial issues:
    - No censoring of criticism
    - No 50c posts arguing against criticism
  - Stop collective action:
    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to
    - ↓ common knowledge of grievances  $\rightsquigarrow$  ↑ cost of coordination

# Theoretical Implications

- For China:
  - Do not engage on controversial issues:
    - No censoring of criticism
    - No 50c posts arguing against criticism
  - Stop collective action:
    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to
    - ↓ common knowledge of grievances  $\rightsquigarrow$  ↑ cost of coordination
  - We find: China has two versions of common knowledge

# Theoretical Implications

- For China:
  - Do not engage on controversial issues:
    - No censoring of criticism
    - No 50c posts arguing against criticism
  - Stop collective action:
    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to
    - ↓ common knowledge of grievances  $\rightsquigarrow$  ↑ cost of coordination
  - We find: China has two versions of common knowledge
    - Grievances (allowed)

# Theoretical Implications

- For China:
  - Do not engage on controversial issues:
    - No censoring of criticism
    - No 50c posts arguing against criticism
  - Stop collective action:
    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to
    - ↓ common knowledge of grievances  $\rightsquigarrow$  ↑ cost of coordination
  - We find: China has two versions of common knowledge
    - Grievances (allowed) no problem, already well known

# Theoretical Implications

- For China:
  - Do not engage on controversial issues:
    - No censoring of criticism
    - No 50c posts arguing against criticism
  - Stop collective action:
    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to
    - ↓ common knowledge of grievances  $\rightsquigarrow$  ↑ cost of coordination
  - We find: China has two versions of common knowledge
    - Grievances (allowed) no problem, already well known
    - Collective action (not allowed)

# Theoretical Implications

- For China:
  - Do not engage on controversial issues:
    - No censoring of criticism
    - No 50c posts arguing against criticism
  - Stop collective action:
    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to
    - ↓ common knowledge of grievances  $\rightsquigarrow$  ↑ cost of coordination
  - We find: China has two versions of common knowledge
    - Grievances (allowed) no problem, already well known
    - Collective action (not allowed) big problem, emergency action required

# Theoretical Implications

- For China:
  - Do not engage on controversial issues:
    - No censoring of criticism
    - No 50c posts arguing against criticism
  - Stop collective action:
    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to
    - ↓ common knowledge of grievances  $\rightsquigarrow$  ↑ cost of coordination
  - We find: China has two versions of common knowledge
    - Grievances (allowed) no problem, already well known
    - Collective action (not allowed) big problem, emergency action required
  - Arguments never end arguments; but distraction does

# Theoretical Implications

- For China:
  - Do not engage on controversial issues:
    - No censoring of criticism
    - No 50c posts arguing against criticism
  - Stop collective action:
    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to
    - ↓ common knowledge of grievances  $\rightsquigarrow$  ↑ cost of coordination
  - We find: China has two versions of common knowledge
    - Grievances (allowed) no problem, already well known
    - Collective action (not allowed) big problem, emergency action required
  - Arguments never end arguments; but distraction does
- For future research:

# Theoretical Implications

- For China:
  - Do not engage on controversial issues:
    - No censoring of criticism
    - No 50c posts arguing against criticism
  - Stop collective action:
    - Respond to grievances to prevent collective action
    - Censor discussion of real-world collective action
    - Distract with cheerleading and positive valence
- For authoritarian regimes:
  - Scholars have thought autocrats want to
    - ↓ common knowledge of grievances  $\rightsquigarrow$  ↑ cost of coordination
