Two projects I'd love your help with

Two projects I'd love your help with

- A Course: The Hidden Curriculum

Two projects I'd love your help with

- A Course: The Hidden Curriculum
- A Book: The Social Science of Science (with Casey Petroff)

Two projects I'd love your help with

- A Course: The Hidden Curriculum
 - What you need to know to succeed in grad school & after

- A Book: The Social Science of Science (with Casey Petroff)

Two projects I'd love your help with

- A Course: The Hidden Curriculum
 - What you need to know to succeed in grad school & after
 - What one cohort teaches the next (outside of class)

- A Book: The Social Science of Science (with Casey Petroff)

Two projects I'd love your help with

- A Course: The Hidden Curriculum
 - What you need to know to succeed in grad school & after
 - What one cohort teaches the next (outside of class)
 - How to answer questions from students, colleagues, etc.

- A Book: The Social Science of Science (with Casey Petroff)

Two projects I'd love your help with

- A Course: The Hidden Curriculum
 - What you need to know to succeed in grad school & after
 - What one cohort teaches the next (outside of class)
 - How to answer questions from students, colleagues, etc.
 - Questions often sound technical, but are wacky...
- A Book: The Social Science of Science (with Casey Petroff)

Two projects I'd love your help with

- A Course: The Hidden Curriculum
 - What you need to know to succeed in grad school & after
 - What one cohort teaches the next (outside of class)
 - How to answer questions from students, colleagues, etc.
 - Questions often sound technical, but are wacky...
 - If I take the questions seriously, answers are silly...
- A Book: The Social Science of Science (with Casey Petroff)

Two projects I'd love your help with

- A Course: The Hidden Curriculum
 - What you need to know to succeed in grad school & after
 - What one cohort teaches the next (outside of class)
 - How to answer questions from students, colleagues, etc.
 - Questions often sound technical, but are wacky...
 - If I take the questions seriously, answers are silly...
 - Best answers: change the question
- A Book: The Social Science of Science (with Casey Petroff)

Two projects I'd love your help with

- **A Course: The Hidden Curriculum**
 - What you need to know to succeed in grad school & after
 - What one cohort teaches the next (outside of class)
 - How to answer questions from students, colleagues, etc.
 - Questions often sound technical, but are wacky...
 - If I take the questions seriously, answers are silly...
 - Best answers: change the question
 - Why not teach this in class? (My plan!)
- **A Book: The Social Science of Science** (with Casey Petroff)

Two projects I'd love your help with

- **A Course: The Hidden Curriculum**
 - What you need to know to succeed in grad school & after
 - What one cohort teaches the next (outside of class)
 - How to answer questions from students, colleagues, etc.
 - Questions often sound technical, but are wacky...
 - If I take the questions seriously, answers are silly...
 - Best answers: change the question
 - Why not teach this in class? (My plan!)
- **A Book: The Social Science of Science** (with Casey Petroff)
 - Science: one of humanities greatest inventions

Two projects I'd love your help with

- **A Course: The Hidden Curriculum**

Progress in (Social) Science

Progress in (Social) Science

- Individual humans are impossible

Progress in (Social) Science

- Individual humans are impossible
 - Economists:

Progress in (Social) Science

- Individual humans are impossible
 - Economists: maximize our own self-interest

Progress in (Social) Science

- Individual humans are impossible
 - Economists: maximize our own self-interest
 - Psychologists:

Progress in (Social) Science

- Individual humans are impossible
 - Economists: maximize our own self-interest
 - Psychologists: biased decision makers

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:**

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”?

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!
 - > 130 fields, all different, contradictory textbook advice

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!
 - > 130 fields, all different, contradictory textbook advice
 - Medicine (RCTs),

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!
 - > 130 fields, all different, contradictory textbook advice
 - Medicine (RCTs), Astronomy (observation),

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!
 - > 130 fields, all different, contradictory textbook advice
 - Medicine (RCTs), Astronomy (observation), Physics (can't observe),

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!
 - > 130 fields, all different, contradictory textbook advice
 - Medicine (RCTs), Astronomy (observation), Physics (can't observe), Social science (avoid threats to inference), etc.

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!
 - > 130 fields, all different, contradictory textbook advice
 - Medicine (RCTs), Astronomy (observation), Physics (can't observe), Social science (avoid threats to inference), etc.
 - Follow advice in methods courses?

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!
 - > 130 fields, all different, contradictory textbook advice
 - Medicine (RCTs), Astronomy (observation), Physics (can't observe), Social science (avoid threats to inference), etc.
 - Follow advice in methods courses? Insufficient.

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!
 - > 130 fields, all different, contradictory textbook advice
 - Medicine (RCTs), Astronomy (observation), Physics (can't observe), Social science (avoid threats to inference), etc.
 - Follow advice in methods courses? Insufficient.
 - Work harder as a scholar?

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!
 - > 130 fields, all different, contradictory textbook advice
 - Medicine (RCTs), Astronomy (observation), Physics (can't observe), Social science (avoid threats to inference), etc.
 - Follow advice in methods courses? Insufficient.
 - Work harder as a scholar? Nope; you're still human!

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
- How can humanity make progress with raw material like that?
 - The “scientific method”? No such thing!
 - > 130 fields, all different, contradictory textbook advice
 - Medicine (RCTs), Astronomy (observation), Physics (can't observe), Social science (avoid threats to inference), etc.
 - Follow advice in methods courses? Insufficient.
 - Work harder as a scholar? Nope; you're still human!
 - Then what?

Progress in (Social) Science

- Individual humans are impossible
 - **Economists:** maximize our own self-interest
 - **Psychologists:** biased decision makers (see what we expect to see; see what we want to see; and don't see what we don't see)
 - **Political scientists:** scheme to get others on our side
